Education

University of Memphis

Memphis, TN

Bachelor of Science, Computer Science (Cybersecurity Concentration)

Expected Graduation: Aug 2027

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Software Engineering, Computer Networking, Software Tools & Techniques (Rails/Django)

Experience

UMRF Ventures

Memphis, TN

Internet Support Specialist – Ting Internet

May 2025 – Present

- Provide technical support for Ting Internet fiber customers, troubleshooting connectivity, modem/router configuration, and Wi-Fi performance issues over phone and remote sessions
- Diagnose network issues from the customer premises to the service level, escalating complex tickets with clear documentation to reduce resolution time
- Document issues and resolutions in the ticketing system while maintaining high customer-satisfaction standards in a call-center environment

Best Buy

Memphis, TN

Sales Associate – Computing & Technology

Nov 2024 – Present

- Provide technical consultation on computers, networking devices, and cybersecurity software; assist customers with device setup, OS configuration, and hardware troubleshooting
- Educate customers on data protection, antivirus tools, and secure home-network setup while meeting sales metrics in a fast-paced environment

White Stars LLC

Memphis, TN

Dispatcher / Customer Service Representative

Mar 2023 – Oct 2024

- Coordinated high-volume service requests through scheduling and dispatch systems, troubleshooting customer issues in real time and maintaining accurate digital records
- Trained new team members on internal systems and operational procedures, improving team efficiency

Projects

Network Traffic Analyzer | Python, Scapy, Flask, SQLite | GitHub

- Built a packet-capture tool with a Flask web dashboard that displays real-time network traffic, logs packets to a SQLite database, and flags suspicious activity for review
- Used Scapy to parse protocol-level packet data (IP, TCP/UDP, DNS), applying detection rules to surface anomalous traffic patterns

Secure Shared To-Do List (Client-Server) | Python, TCP Sockets, TLS, HMAC

- Designed a concurrent TCP server with a browser client served through an HTTP gateway, supporting multiple simultaneous users on a shared task list
- Implemented a secure mode combining TLS encryption with HMAC-signed messages, plus authentication, audit logging, heartbeat monitoring, and response caching for reliability

Divvy – Income & Expense Tracker | React, Vite, Node.js, Express, Supabase

- Developed a full-stack personal finance web app with Google OAuth sign-in, income and expense tracking, PDF payslip parsing, and interactive spending charts on a Supabase (PostgreSQL) backend
- Built a take-home income calculator that estimates net pay across different U.S. states and countries, accounting for region-specific tax rules
- Designed a dark, modern UI inspired by Linear/Stripe design systems for clear visualization of income and spending

Personal Portfolio Website | React, Supabase | Live Site

- Designed and deployed a full-stack portfolio with a React frontend on Vercel and a Supabase backend, showcasing projects and experience

Technical Skills

Languages: Python, JavaScript, C#, C, SQL, HTML/CSS, Ruby

Frameworks: React, Node.js/Express, Flask, Django, Ruby on Rails

Tools & Databases: Git/GitHub, Linux (Kali), Supabase/PostgreSQL, SQLite, MongoDB, Scapy, VS Code

Security: TLS/HMAC message security, SQL injection prevention, penetration testing practice (DVWA), network traffic analysis

Spoken Languages: English, Arabic (native)

Certifications

Cisco – Introduction to Cybersecurity | Codedex – Python | Codedex – HTML
